

Associated Boiler Line Equipment Co., Inc.

Integrity, Safety, Quality
ABLE Company, Trusted since 1972

WE ARE **ABLE**
Boilers, Burners, Instrumentation, & Controls

With over four decades in the industry, The ABLE Company has earned a strong reputation for its expertise in the areas of control system design, SCADA system design, control panel construction, and regional supply of field services for combustion tune-ups, calibration, safety limit testing, control system troubleshooting and control system upgrades. We provide engineered solutions, capital equipment and field services to numerous high profile government, corporate and institutional accounts in the northeastern United States.

Leveraging our decades of experience working in hundreds of boiler plants we work closely with design engineers, end-user and contractors to assure boiler plant equipment is sized properly and instrumentation selection is accurate for conditions. Engineers trust us to help them with developing an accurate and well structured specification and execution plan. End-users know we have their best interest at heart when selecting equipment and contractors take comfort in knowing we are the most experienced boiler commissioning company in the tri-state areas.

From turn-key installations and boiler startups to combustion tuning and instrument calibrations, we have done it all. We offer standard maintenance contracts along with custom "tailored to your needs" support contracts of any duration or scale.

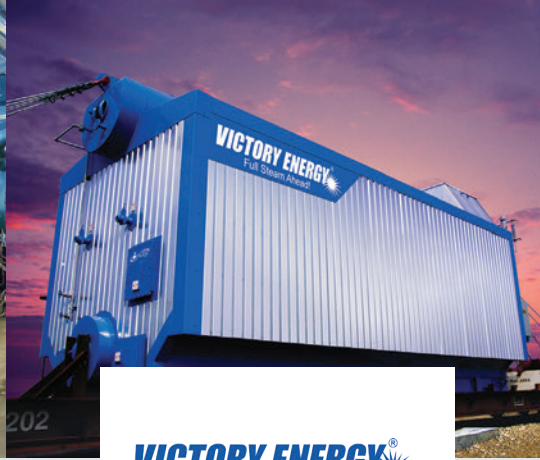

- Legacy System Support
- Routine Maintenance
- Combustion Tuning
- Transmitter Calibration
- Safety Limit Testing
- Boiler Commissioning
- NYCDEP Performance Testing

ABLE Company standard control system solutions are designed to minimize operator intervention while maintaining safe and efficient operations of your boiler equipment. All NeXgen products are based on the latest Allen Bradley Compact LOGIX PLC products and are available with a wide array of optional features. Our systems do not have any proprietary components, utilizing commercially available off the shelf durable components. Our customers never have to worry about our ability to supply spare or replacement parts.

Manufacturers of
 Scotch Marine Firetube Boilers
 Vertical Boilers
 Condensing Boilers
 Heat Recovery Boilers
 Firebox Boilers
 Spray and Tray Deaerators
 Condensate Tanks
 Pump Skids

Manufacturers of
 D-Type Watertube Boilers
 O-Type Watertube Boilers
 Heat Recovery Steam Generators
 Fuel Skids & Stacks

Manufacturers of
 Industrial Boiler Burners
 Duct Burners
 Spare Burner Parts

Manufacturers of
 Rectangular Economizers
 Cylindrical Economizers
 Condensing Economizers
 Small Heat Recovery &
 HRSG's Heat Exchangers

Manufacturers of
 EPA Compliant Opacity
 Standard Opacity Monitors
 Dust Monitors
 Audit Neutral Density Filters

Manufacturers of
 Continuous Emissions Monitoring Systems
 Predictive Emissions Monitoring Systems
